INSERT MAP HERE

SUMMARY OF ENEMY SITUATION (facts)

1. SyAAF shows willingness and ability to commit own air assets to defend own airspace
2. SyAAF shows willingness and ability to commit own air assets to attack CJTF forces – both inside and outside own airspace

INSERT MAP HERE

ASSESSMENT OF ENEMY SITUATION (Short term)

-Expecting SyAAF to mobilize and commit further air assets to defend against - or attack – CJTF air assets

-Expecting SyAAF to continue to exploit shortcomings in CJTF radar coverage inland

-Expecting higher over-all readiness of SyAAF forces, with increased amounts of patrolling flights (CAP) around strategically important assets and areas

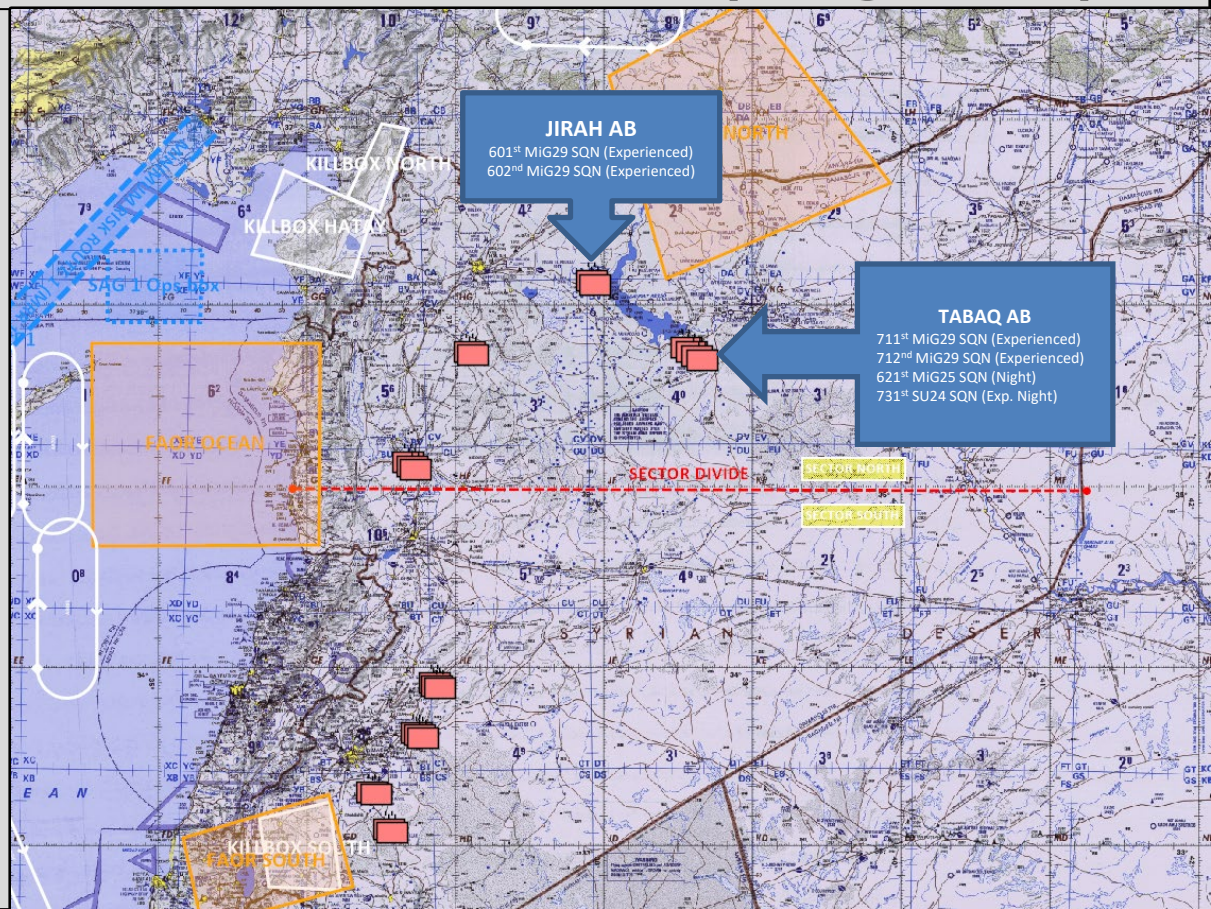

INSERT MAP HERE

ASSESSMENT OF ENEMY SITUATION (long term)

SyAAF is currently unhindered from utilizing their full range of airfields and other assets/infrastructure supporting air operations. The attrition rate is low and their overall ability to defend and attack is not impacted significantly this far in the campaign despite some losses on day one.

1. The assessment is therefore that the SyAAF will be fully able to sustain the current level of operations in the long-term.
2. JIRAH AB lies relatively close to the CJTF forces and should be able to provide QRF air assets to the northern sector of Syria as well as provide a well-defended staging point for air attacks outside Syrian territory. Intel puts the 601st and 602nd here – both experienced MiG29 squadrons
3. Just 40 NM S/E of JIRAH AB lies TABAQ AB hosting the 701st and 702nd squadrons – two additional experienced MiG29 squadrons, along with 622nd MiG25 squadron.
